A little bit about Marley...

Marley is a lovely lad who came to the centre via inspectors after being found in absolutely terrible condition. This poor dog was completely matted and had to have all his fur shaved off, the fur that was shaved off weighed a whole kilo. His eyes were terribly sore from where the matted fur had irritated them so much. Marley was taken straight to vets for emergency treatment. After he was shaved, it revealed the true extent of how badly damaged his eyes were caused by the neglect. Marley was put on a strict eye treatment regime of three different eye drops four times a day. As each day passes his eyes improve little by little, Marley also had a lump on his eye that needed removing for which he has now had surgery and thankfully his eyes are much better. Now Marley is feeling better and is not in pain his little character is starting to shine, he is so much happier being out and about and has even started to play with toys. Marley is a really sweet little dog who just loves his cuddles and getting attention from his people. Marley does have a deformed front leg and manages on it fine, he is better suited to adopters who can take him on small walks rather than one big one. Marley has been through so neglect and now all he needs is a family to give him the loving home he deserves.

My personality...

I walk nicely on a lead

I need teaching that it's ok to be alone

I could live with children of
secondary school age

I'm quiet but full of love

I may be able to live with another
dog

I love fuss and attention
