A little bit about Sasha...

Sasha's story began in the saddest of circumstances. She came into the RSPCA's care following a visit from an inspector after being found in an incredibly poor state. She had virtually no fur on her body due to a severe, untreated allergic reaction to fleas. Her skin was desperately sore and she was in a great deal of pain. Fast forward a couple of months, and thanks to intensive veterinary treatment, good food and plenty of love and TLC, Sasha is a very different dog. Her skin has made fantastic progress, although she still has a little way to go before it is completely healed. Now, this special girl is finally ready to find the loving forever home she deserves. Sasha absolutely adores people and loves nothing more than spending quality time with her humans. Well, almost nothing… because there is one thing that might just rival cuddles and companionship – FOOD! Sasha is a girl who certainly enjoys her meals, and we like to reassure her that those days of wondering where her next meal is coming from are firmly behind her. She will never have to worry about being fed again. Sasha's past is behind her, and now it's all about looking forward to a brighter future filled with love, kindness, full tummies and all the happiness she could ever wish for. Sasha will need to be the only pet in the home. Although she is happy to walk alongside other dogs, she would much prefer not to share her home with one. After everything she has been through, Sasha deserves a family who will cherish her, continue to support her as she heals and show her just how wonderful life can be. Could you be the happy ending Sasha has been waiting for? She can live with children of secondary school age and over.

My personality...

- I know how to sit (and lots of other commands too!)
- I could live with children of secondary school age
- I need to be the only dog in the home
- I can be left alone for short periods
- I love to snooze
- I love food and treats
