A little bit about Danny...

Danny came to the centre via an inspector after being found in appalling condition abandoned on the streets and left to fend for himself. Danny has now received the medical treatment he needed and is on the road to recovery, we now feel he is ready to start his search for a forever home. Danny has been left quite traumatized by the neglect he suffered on the streets, he is quite fearful of new people until he knows you are not going to hurt him. We are looking for adopters who will understand what he has been through and give him the time he needs to settle into family life. Danny will need a separate room of his own to begin with as he will need time to adjust and get used to being in a home again. Danny really does deserve his chance of happiness, he has been through such a tough time. We need to leave his past behind him now and look to the future. Danny will need to be a house cat as he has tested positive for FIV and is also hyperthyroid, he is also on pain relief for a sore back. Staff will be happy to discuss any worries potential adopters may have. He will need an adult only home.

My personality...

I'd prefer to be the only cat in a home

I need to be kept indoors

I'd prefer an adult only household

I'm a shy guy; I'll need time to settle

I would prefer not to live with a dog
