## A little bit about Slick Sharky & Bear...

These 3 boys came to the animal home via an inspector after being found living in appalling conditions, they are very friendly and apart from their food they love nothing more than a cuddle. Unfortunately due to the horrendous conditions they were forced to live in before coming to the centre they have developed an on going medical condition called Mycroplasma which they receive medication for. Staff will be happy to discuss this condition to any potential adopters.
